

SAP**Duration – 60 Hours****Program Description**

This program provides an end-to-end introduction to SAP, one of the leading enterprise resource planning (ERP) systems. Participants will learn the fundamentals of SAP modules, system navigation, configuration, and integration. The program emphasizes hands-on exercises to manage business processes effectively and gain practical experience in enterprise environments.

Learning Goals

- Understand SAP architecture and key modules (e.g., SAP FI, CO, MM, SD)
- Learn navigation, configuration, and customization of SAP systems
- Understand business process integration across different modules
- Gain practical skills in reporting, analytics, and workflow management
- Explore best practices for SAP implementation and support
- Develop hands-on experience with real-world SAP scenarios

Course Topics

- Introduction to SAP and ERP Systems
- SAP Architecture and Navigation
- Core SAP Modules Overview (FI, CO, MM, SD, HR)
- Configuration and Customization Basics
- Business Process Integration in SAP
- Reporting and Analytics in SAP
- Workflow Management and Automation
- Best Practices for SAP Implementation
- Hands-on Projects and Case Studies

Modules can be customized to suit client's specific needs and duration accordingly
