

## Adobe Developer

**Duration - 4 Days / 32 Hours**

### Program Description

The training program offers a comprehensive overview of Adobe's development ecosystem, focusing on setting up the development environment, integrating Adobe Experience Platform APIs, and mastering Adobe's various tools such as Analytics, Target, Campaign, and Commerce.

It includes hands-on modules on Adobe Experience Manager (AEM), covering both frontend and backend development, RESTful APIs, and deployment best practices.

The course wraps up with advanced techniques, project work, and case studies for practical application of the learned skills.

### Learning Goals

- ❖ Use and create APIs using Adobe Developer Console
- ❖ Interact with various Adobe solutions using APIs
- ❖ Understand and learn how to develop APIs inside of AEM

### Course Topics

- ❖ Overview of Adobe Developer Tools and Technologies
- ❖ Adobe APIs and SDKs
- ❖ Adobe Experience Cloud Integration
- ❖ Adobe Experience Manager Development
- ❖ Advanced AEM Development
- ❖ Adobe Developer Best Practices and Project Work
