

Anaplan

Duration - 5 Days / 40 Hours

Program Description

This program introduces the fundamentals of Anaplan, focusing on effective model design and customization.

Participants will learn how to create and optimize modules within Anaplan, with a focus on building a centralized data hub model and improving model performance.

The course combines foundational knowledge with practical skills, enabling learners to design scalable, efficient models that support complex business planning and analysis.

Learning Goals

- ❖ Understand the core principles and functionality of Anaplan.
- ❖ Develop skills in designing and structuring Anaplan modules for various business needs.
- ❖ Customize modules to align with specific organizational requirements.
- ❖ Build a data hub model to centralize and streamline data management.
- ❖ Optimize model performance to improve efficiency and scalability in Anaplan

Course Topics

- ❖ Introduction of Anaplan
- ❖ Module Designing
- ❖ Module Customization
- ❖ Data Hub Model Builder
- ❖ Model Performance Optimization
